

# Basic Digital Photography

## Course Setup

This is a PowerPoint presentation where we will be discussing the various camera settings and what they do while we look at some examples of each. Participants are asked to bring their cameras with them so that while we discuss the different settings they can find those settings on their camera.

Participants will receive a handout of the slides with my discussion notes so that there is no need to take any notes.

## During the course we will be covering topics such as:

### **Camera Settings**

- White Balance
- Aperture
- F-stop
- Shutter Speed
- Metering and focusing modes
- Camera Presets (Portrait, Sport, etc)
- Optical vs. Digital zooming
- Image size and Quality

### **Photographic Options**

- Fill Flash
- Memory Cards
- Composition
- Accessories
- Filters
- etc.

### **Image Processing**

- Basic Image Manipulation (correcting for white balance and exposure)

### **Dealing with Situations**

- Moving subjects
- Backlighting
- Photographing concerts (kids concerts)
- etc.
